our classics for all purposes

everything you need for efficient cleaning

sanitary cleaning:

Sanifix fantastic 335

Sanitary cleaner based on a new organic acid for routine cleaning. Effortlessly dissolves limescale, urine and water scale, cement residue, lime soap residues as well as grease and oil soiling. Has a rust-dissolving effect and still protects fittings. Economical to use. For residue-free cleaning with high material protection on all acid-resistant materials and surfaces (sinks, bathrooms, showers, toilets, tubs, tiles, etc.). Higher doses for heavy soiling - can also be used undiluted.

further product information on page 33

all purpose cleaning:

Vuril 146

Powerful universal cleaner for all washable, water-proof surfaces such as tiles, plastic, tiles, enamel, anodized aluminum, marble, painted surfaces, etc. Can be used in all object areas. Dose higher if heavily soiled. Wipe as usual.

further product information on page 11

maintenance cleaning:

Purito 219

High-performance concentrate, strongly wetting due to high boundary/surface activity. Developed for water-repellent coverings made of polyurethane, factory-PU-coated floor coverings, microporous surfaces, ceramics and fine stoneware. High cleaning power, good dirt binding, no streaking. Suitable for the one-step wiping process. With practical dosing head.

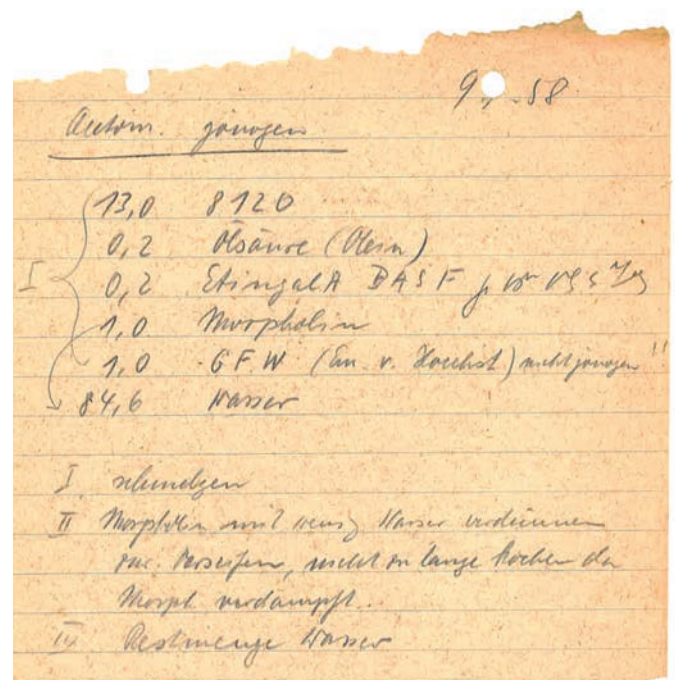

further product information on page 18

OTTO OEHME GmbH – An institution in the cleaning industry over 90 years of tradition and experience

In 1923 Willy Oehme, Nuremberg, founded the Lorito S.A. in Vevey, Switzerland, at the Lake Geneva. At that time the range of products was limited to the Creme Lorito, a uni-versal cleaning agent for the „housewife“ to clean, polish and disinfect wood, leather, linoleum and other types of solid surfaces. The creme is produced to this day. In 1970 his son Otto Oehme (top right picture) took over the company that now had its place of business in Wendelstein south of Nuremberg. The newly founded Otto Oehme GmbH (a limited company) shifted its focus to business clients and broadened its portfolio of products gradually. In 1998 the company moved to the current premises in Allersberg that house management as well as production.

To maintain the continued existence of the company Ulla Oehme and Klaus Krisch joined management in 2003. Two years later the company expanded and multiple foreign subsidiaries were founded - at the moment the Otto Oehme GmbH is represented in more than 20 countries. Large-scale consumers in Germany and the EU are supplied by the company's own private haulage. In the meantime the range of products has been extended to additives, auxiliary equipment and machines. In 2010 Ulla Oehme took over the company shares and is now the full owner of the company. Since 2017 her son Carlos Oehme joined Klaus Krisch in management position.

In addition to quality and reliability, good and maximum customer satisfaction are important to us. Our long-standing customers include, for example, well-known companies in the hotel and catering sectors as well as numerous public institutions and industrial companies.

You will be looked after personally by our trained specialist advisors at all times. We regularly organize seminars for our customers, led by well-known speakers.

In addition to our numerous memberships in research communities and professional associations and our participation in the Bavarian Environmental Pact, we stand by our ecological commitment. We use renewable raw materials for production

With our products "made in Germany" and a stronger focus on sustainability, we are laying the foundation of another successful century.

Carlos Oehme
CEO

committed to the environment

The Otto Oehme GmbH is a member of multiple research communities and professional associations (such as IHO, IKW, VCI, FRT, ARGE) as well as a participant in the „Environmental Pact“ of Bavaria (Umwelt-pakt Bayern). Since 1923 all compositions of cleaning agents and care products have always been produced in-house. They are free of CFC, chlorocarbons and aromatic solvents. In order to meet our ecological and economic obligations, we use renewable raw materials wherever possible.

Furthermore, all of our cleaning agents comply with legal regulations by directive 1999/45/EC of the EU (relating to the classification, packaging and labelling of dangerous preparations), the German Detergent and Cleaning Agent Act (Wasch- und Reinigungsmittelgesetz - WRMG, 1987), the German Chemicals Act (Chemikaliengesetz - ChemG, revision 2002) and Hazardous Substances Ordinance (Gefahrstoffverordnung - GefStoffV, 2010). That means that our products - when used properly - will not endanger the physical health of a person.

The forceful legislation of the EU, particularly the Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), that makes special demands on environmental protection as well as health protection, is strictly adhered to at all times. If procurable we outrun these legal guidelines and offer our customers products with maximal environmental sustainability and user protection. Thus, for example, we offer products following Decision 2005/344/EC by the EU, a regulation for the EU Ecolabel. For these products an environmental assessment process according to a special questionnaire is no longer necessary. Our disinfectants are listed by the Association for Applied Hygiene (Verbund angewandter Hygiene

- VAH, former DGHM), several sanitary cleaners are included in the RK-list.

Topseller

Sanifix Ecoline®

Particularly environmentally friendly and label-free sanitary cleaner based on amidosulfonic acid for routine cleaning. Effortlessly dissolves lime, urine and water scale, cement residue, grease and oil soiling as well as lime soap residues. Has a rust-dissolving effect and still protects fittings. Economical to use. For residue-free cleaning with maximum material protection on all acid-resistant materials and surfaces.

Lorito Ecoline®

Environmental protection and user friendliness

As an innovative and future-oriented cleaning agent manufacturer with almost 100 years of experience in the cleaning industry, the preservation and protection of our environment is very important to us. It is not for nothing that we have been producing our products with sustainability in mind for several decades now.

Our Lorito Ecoline® represents environmentally friendly, label-free and highly concentrated quality mixtures for professional use. All Lorito Ecoline® products are based on forward-looking recipes.

The packaging materials of the product line are produced with intensive use of renewable or recyclable raw materials. Environmental compatibility and, above all, user-friendliness are the top priorities in the development of our Lorito Ecoline®.

tips for basic cleaning

In just a few steps to the desired success:

1. Choose a suitable basic cleaner. The choice of basic cleaner always depends on the floor covering. Please always refer to the product descriptions and data sheets. You can get an initial overview in the interface matrix on page 15.
2. dosing
The correct dosage is very important. This always depends on the nature of the soil. Always observe the application instructions for this.
3. application
Always use the appropriate cleaning procedure. Some products are suitable for manual and machine cleaning.
4. let absorb
After applying the cleaning agent, the exposure time must always be observed.
5. note special features
Absorbent coverings must be neutralized with clear water (pH value 7-8). Before applying the coating, the covering must be completely dry. It is essential to observe the drying times between the 2-3 layers (depending on the covering)!

wipe care – without care components

Alkorein 254

Neutral cleaning concentrate for cleaning and care of natural and artificial stone, heavily soiled hard floors, tiles, ceramics, plastics, painted and enamelled surfaces, glass etc. Suitable for all manual processes and for automatic cleaning.

private label your brand – our products

Would you like your own brand in the area of cleaning and care products to supplement your existing own products, to expand the range or to open up new markets? We are happy to support you! Whether for hotels, retail chains, public facilities, hospitals, care facilities or restaurants: we take care of both the content and the external appearance of your cleaning or care product.

Benefit from comprehensive personal support from a single source and our almost 100 years of experience in the market. Whether it is a direct takeover, modification or new development of a product - with our wide range of cleaning and care products for the most diverse sectors, we are prepared for all eventualities. Our long-standing customers include, for example, companies in the hotel and catering sectors as well as public

institutions and industrial companies.

From recipe development through production, filling and labeling to storage and logistics, we handle all processes for our private label customers in-house. In addition, we support you in all questions relating to label and bottle design, advise you on the legal obligations as a manufacturer (own brand) and offer support for the necessary measures under the Product Liability Act (safety data sheet, BfR notification, poison emergency call recommendation). It goes without saying that all EU directives are complied with.

Our high quality of the recipes and raw materials used as well as our own, timely and flexible production - Made in Germany - are our key to success. We also focus on environmental compatibility and ecology, from

private label

From the idea to the finished product

1. product selection (takeover, adaptation or new development)
2. determination of container size and number of items (at least 1200 liters)
3. legal (support for compliance legal obligations, e.g. safety data sheet, product descriptions)
4. labels (design, verification of legal requirements, printing)
5. product outer packaging (cardboard boxes)
6. production

the raw materials to packaging and shipping.

Talk to us, we would be happy to advise you!

info@oehme-lorito.de

Our private label services:

- almost 100 years of experience in the cleaning agent market
- comprehensive, competent and personal advice
- own recipes or new development
- Product approvals and Registration
- production
- bottling and labelling
- creation of product and safety data sheets
- logistics processing (packaging, storage and neutral shipping to customers)

Your advantages:

- use of existing infrastructure and coordinated production processes
- higher margins
- building a brand image
- stand out from the competition
- unmistakable range with high recognition value
- any variation of the products

You can benefit from these advantages and build up your own brand with us as your partner!

Disinfectant list of the Association of Applied Hygiene (VAH)

The disinfectant list of the VAH (Association for Applied Hygiene) has been the proven reference for products for prophylactic disinfection that have been tested for effectiveness for many years. This quality assurance is not only relevant for the medical sector, but also for public institutions and, in the case of illness, even for private households. Because it has been proven that the majority of infections originate in private households. For the first time, the VAH list also contains information on effectiveness against viruses.
www.vah-online.de

Disinfectant list of veterinary medicine

The German Veterinary Medical Society (DVG e.V.) is the scientific society of veterinary medicine. The „Disinfection in Veterinary Medicine“ committee of the DVG publishes lists of disinfectants that have been tested according to the guidelines of the DVG and found to be effective. Founded in 1951, the DVG is the oldest organization of veterinary medicine in Germany. Veterinarians from universities, practices, industry, authorities, ministries and research institutes come together in 36 specialist groups and in special working groups/committees under the umbrella of the DVG.
www.dvg.net

List of tested cleaning agents for ceramic coverings in swimming pools (List RK) and list of tested cleaning agents for pool bodies and components made of stainless steel in swimming pools (List RE)

The publications of the Deutsche Gesellschaft für das Badewesen e. V. (DGfDB) enjoy an excellent reputation in the professional world and can be equated with the DIN standards from a technical point of view. They are therefore the indispensable prerequisite for the safe construction and operation of public pools.
Lists of tested cleaning agents that are suitable for cleaning public pools are published at regular intervals.

EU Ecolabel for all-purpose and sanitary cleaners

The EU Ecolabel is the EU eco-label recognized in all member states of the European Union, but also in Norway, Liechtenstein and Iceland. Introduced in 1992 by an EU regulation (Regulation EEC 880/92), the voluntary label has gradually become a point of reference for consumers wishing to contribute to reducing pollution by purchasing more environmentally friendly products and services.
The EU Ecolabel guarantees consumers that products labeled with it have a lower environmental impact than comparable products without a label.
www.eu-ecolabel.de

DIN EN ISO 9001

ISO 9001 is the nationally and internationally most widely used standard in quality management. It defines the minimum requirements for a quality management system through process optimization.

DIN EN ISO 14001

The international environmental management standard ISO 14001 specifies globally recognized requirements for an environmental management system - with a focus on a continuous improvement process as a means of achieving the defined goals in relation to environmental performance. The aim is to define a corporate environmental policy, environmental goals and an environmental program.

Application of sweepings

- Basically, sweepings are used to remove dust and stubborn dirt from dirty floors without water.
- The sweepings should be turned upside down before the cleaning process so that they are well distributed in the packaging.
- Before applying the sweepings, the floor does not have to be cleaned beforehand
- They are then spread over a large area on the floor and wiped up again with a gentle mop.
- Sweepings leave no residue on the floor during this process.

general terms and conditions

General Terms and Conditions of Otto Oehme GmbH

I. General / Scope

1. We deliver exclusively under the following terms and conditions of sale and delivery, which also apply to future deliveries and supplementary orders, including consulting services.
2. Deviating, conflicting or supplementary general terms and conditions of the buyer are contradicted. They only become part of the contract if their validity is expressly recognized in writing.
3. Deviations or ancillary agreements require the express written confirmation of the management.
4. Our offers are non-binding. The contract comes about through the written order confirmation or through the execution of the order.
5. Electronic orders will be confirmed immediately. The confirmation of receipt does not constitute a binding acceptance of the order. The confirmation of receipt can be combined with the declaration of acceptance.
6. The minimum order amount is 150 euros net.
7. Electrically operated cleaning machines and systems from Otto Oehme GmbH are only sold as work machines for commercial and industrial applications and do not fall under the scope and regulations of the Electrical and Electronic Equipment Act - ElektroG.

II. Prices and terms of payment

1. The prices offered on the day of the order apply, plus statutory sales tax without any deductions.
2. Our prices are ex works or delivery warehouse. Costs for packaging, freight, postage and insurance as well as other shipping costs will be charged separately.
3. Payment is due within 14 calendar days of the invoice date without deduction. After this period has expired, the customer is in default of payment and interest is to be paid on the claim in accordance with §§ 286, 288 BGB.
4. The customer only has the right to offset if his counterclaims have been legally established or have been recognized by us. The customer can only exercise a right of retention if his counterclaim is based on the same contractual relationship.

III. delivery

1. Delivery dates are only approximate unless we have confirmed them in writing as binding. If the deadline is exceeded, the buyer must set a reasonable grace period in writing. Default can occur at the end of the grace period at the earliest.
2. In the event of delay or impossibility of performance for which we are responsible, the buyer's rights are limited to withdrawing from the contract. Further claims, in particular claims for damages, are excluded unless we acted intentionally or with gross negligence.
3. Unforeseen events that make it technically or economically impossible or difficult for us to fulfill our service and for which we are not responsible entitle us to withdraw from the contract in whole or in part or to reasonably postpone our delivery without the buyer being entitled to compensation or subsequent delivery.
4. We are entitled to make partial deliveries at any time.
5. The risk of accidental loss and accidental deterioration of the goods passes to the buyer upon handover, in the case of mail-order sales upon delivery of the goods to the forwarding agent, carrier or other person or institution responsible for carrying out the shipment. The handover is the same if the buyer is in default of acceptance.

IV. Retention of title

1. We reserve ownership of the delivered goods as long as we are still entitled to claims from the current business relationship with the buyer.
2. Our goods may be resold or processed in accordance with the purpose of the contract until revoked, but they may not be pledged or assigned as security without our written consent. If the goods are processed with goods that do not belong to us, we acquire co-ownership of the

new item in relation to the value of the goods delivered by us to the other processed goods. If the goods are resold, the purchase price claim up to the amount of our claim, including default interest and legal costs, takes the place of the goods. The purchase price claim is hereby assigned to us as security.

3. The customer is obliged to notify us immediately of third-party access to the goods, for example in the event of seizure, as well as any damage or destruction of the goods. The customer must notify us immediately of any change of ownership of the goods or any change of branch.

4. We are entitled to withdraw from the contract and to demand the return of the goods if the customer acts in breach of contract, in particular in the event of default in payment or in the event of a breach of an obligation under Section 3 of this provision.

5. The entrepreneur is entitled to resell the goods in the ordinary course of business. He already assigns to us all claims in the amount of the invoice that accrue to him from the resale to a third party. We accept the assignment. After the assignment, we are authorized to collect the claim. We reserve the right to collect the claim as soon as the entrepreneur does not properly meet his payment obligations and defaults on payment.

V. Warranty / Defects

1. The buyer has to check the shipment completely, quantitatively and qualitatively as well as otherwise for correctness immediately after receipt. Complaints about material defects, incorrect deliveries, quantity discrepancies or other are to be asserted in writing without delay, insofar as they can be determined by reasonable examinations - in the case of recognizable defects within a limitation period of seven days after receipt of the goods. Deadline is sufficient for the timely dispatch. The buyer bears the full burden of proof for all prerequisites for a claim, in particular the defect itself, for the time the defect was discovered and for the timeliness of the notice of defects.

2. All complaints must be accompanied by samples of the goods complained about, otherwise the complaints cannot be processed.

3. In the case of justified complaints, we initially provide a warranty for defects in the goods, at our discretion, by rectification or replacement delivery. If an exchange is not possible for us or if the replacement delivery is again defective, we will either take back the goods (withdrawal) or grant a price reduction (reduction) at the option of the buyer. Further claims are excluded. In the case of only minor defects, the customer has no right of withdrawal. Claims for damages by the buyer of any kind, with the exception of those arising from a product liability law or product liability itself, are excluded, unless we are guilty of intent or gross negligence. Chemical products (cleaning agents), care products, coatings, etc. can be taken back up to a maximum of 12 months after the date of purchase (except for complaints).

4. There is no right of return for custom-made products.

VI. information and advice

1. Information and advice from our employees is provided to the best of our knowledge and ability, but is subject to change and non-binding. They do not justify any contractual legal relationship, nor any secondary obligation from the purchase contract, so that we are not liable for this activity. Information and advice is a voluntary customer service that does not justify any liability on our part or our employees.

2. Assurances are only binding if they are made in writing by the management.

VII. Place of Performance / Place of Jurisdiction

1. The place of performance for the services of the buyer and the services of the seller - also in the case of sale carriage paid or fob etc. - is Schwabach.

2. If the buyer is a registered trader, the place of jurisdiction

for all disputes arising from the contractual relationship is our place of business or, at our option, the general place of jurisdiction of the buyer. This also applies if the customer does not have a general place of jurisdiction in Germany.

VIII. Data Protection

According to the provisions of the Federal Data Protection Act, we are permitted to store personal data within the scope of the purpose of the contractual relationship. This data is only used in the legally permitted ways. With the acknowledgment of these sales and delivery conditions, the buyer is informed about the storage of his data.

IX. Limitations of Liability

1. In the case of slightly negligent breaches of duty, our liability is limited to the foreseeable, contract-typical, direct average damage depending on the type of goods. This also applies to slightly negligent breaches of duty by our legal representatives or vicarious agents. We are not liable to companies for slightly negligent breaches of insignificant contractual obligations.

2. The above limitations of liability do not apply to product liability claims by the buyer. Furthermore, the limitations of liability do not apply to damage to the customer's body or health that is attributable to us.

3. Claims for damages by the customer due to a defect expire one year after delivery of the goods. This does not apply if we can be accused of gross negligence or fraudulent intent.

X. Miscellaneous

1. The law of the Federal Republic of Germany applies. The provisions of the UN sales law do not apply.

2. Should individual provisions of the contract with the customer, including these General Terms and Conditions, be or become wholly or partially invalid, this shall not affect the validity of the remaining provisions. The wholly or partially ineffective regulation should be replaced by a regulation whose economic success comes as close as possible to that of the ineffective one.
